

Why do we need The RESEARCH FOR ALL Act?

Heart disease: the #1 killer of *all* Americans

Only 1/3 of subjects in cardiac clinical trials are women.

Only 30% of cardiac studies with women report outcomes by sex.

Diabetes drug study:
Drug may *lower* women's risk of heart failure but *increase* men's

The Fight Against Alzheimer's Disease

2/3
patients
are women

Men are
50%
less likely
to get it

“Medical research that is gender-neutral or skewed to male physiology puts women at risk for missed opportunities for prevention, incorrect diagnoses, misinformed treatments, sickness, and even death.”
Researchers at Brigham and Women's Hospital
